1	pubmed:20301659	<a href="#">Pyridoxine-Dependent Epilepsy – <i>ALDH7A1</i></a>	Sidney M Gospe	CLINICAL CHARACTERISTICS: Pyridoxine-dependent epilepsy – ALDH7A1 (PDE-ALDH7A1) is characterized by seizures not well controlled with anti-seizure medication that are responsive clinically and electrographically to large daily supplements of pyridoxine (vitamin B(6)). This is true across a phenotypic spectrum that ranges from classic to atypical PDE-ALDH7A1. Intellectual disability is common, particularly in classic PDE-ALDH7A1.	pmid:20301659 nbk:NBK1486	Fri, 01 Jan 1993 06:00:00 -0500
2	pubmed:34978780	<a href="#">SETD2 Neurodevelopmental Disorders</a>	John Pappas Rachel Rabin	CLINICAL DESCRIPTION: SETD2 neurodevelopmental disorders (SETD2-NDDs) represent a clinical spectrum that most commonly includes various degrees of intellectual disability and behavioral problems (most typically an autism spectrum disorder), macrocephaly with or without ventriculomegaly, brain malformations (including Chiari 1 malformation and syringomyelia), and obesity with generalized overgrowth and advanced bone age. A specific, somewhat different phenotype (denoted SETD2-NDD with multiple...	pmid:34978780 nbk:NBK575927	Fri, 01 Jan 1993 06:00:00 -0500
3	pubmed:36126409	<a href="#">Combination of apatinib with apo-IDO1 inhibitor for the treatment of colorectal cancer</a>	Longbo Yu Yuanyuan Wang Yingxue He Haiqing Zhong Shushan Ge Yi Zou Yisheng Lai Qiang Xu Jian Gao Wen Liu Wenjie Guo	Colorectal cancer (CRC) is the third most common cancer in the world. Recently, many clinical studies have demonstrated the therapeutic potential of immune checkpoint therapy combined with inhibitors of vascular endothelial growth factor receptor 2 (VEGFR2) in colon cancer. Compound B37, identified in our previous experiment, is an apo-form indoleamine-2,3-dioxygenase 1 inhibitor (apo-IDO1 inhibitor), which has been shown to significantly suppress tumor growth combined with an anti-PD1 antibody....	pmid:36126409 doi:10.1016/j.intimp.2022.109233	Tue, 20 Sep 2022 06:00:00 -0400
4	pubmed:36126453	<a href="#">Wnt/-catenin targeting in liver carcinoma through nanotechnology-based drug repurposing: A review</a>	Priyadarshini Mohapatra Natarajan Chandrasekaran	Liver cancer is the fifth most widespread in the world, with a high fatality rate and poor prognosis. However, surgical resection, thermal/radiofrequency ablation, chemo/radioembolization and pathway targeting to the cancer cells are all possible options for treating Liver Carcinoma. Unfortunately, once the tumour has developed and spread, diagnosis often occurs too late. The targeted therapy has demonstrated notable, albeit modest, efficacy in some patients with advanced HCC. This demonstrates the...	pmid:36126453 doi:10.1016/j.biopha.2022.113713	Tue, 20 Sep 2022 06:00:00 -0400

5	pubmed:36126477	<a href="#">Ten-year follow-up of the observational RASTER study, prospective evaluation of the 70-gene signature in ER-positive, HER2-negative, node-negative, early breast cancer</a>	Sonja B Vlieg Florentine S Hilbers Agnes Jager Valesca P Retèl Jolien M Bueno de Mesquita Caroline A Drukker Sanne C Veltkamp Anneke M Zeillemaker Emiel J Rutgers Harm van Tinteren Wim H van Harten Laura J van 't Veer Marc J van de Vijver Sabine C Linn	CONCLUSIONS: These data confirm that clinically high-risk, genomically low-risk tumours have an excellent outcome in the real-world setting of shared decision-making. Together with the updated results of the MINDACT trial, these data support the use of the MammaPrint, in ER-positive, HER2-negative, node-negative, clinically high-risk breast cancer patients.	pmid:36126477 doi:10.1016/j.ejca.2022.07.036	Tue, 20 Sep 2022 06:00:00 -0400
6	pubmed:36126544	<a href="#">New insights into the antiviral activity of nordihydroguaiaretic acid: Inhibition of dengue virus serotype 1 replication</a>	Florencia Martinez Lucia Maria Ghietto Giuliana Lingua M Laura Mugas J Javier Aguilar Pedro Gil M Belén Pisano Juliana Marioni María Gabriela Paglini Marta S Contigiani Susana C Núñez-Montoya Brenda S Konigheim	CONCLUSION: The present work contributes to the knowledge of NDGA activity on DENV. We describe its activity on DENV1, a serotype different to those that have been already reported. Moreover, we provide evidence on which stage/s of the viral replication cycle NDGA exerts its effects. We suggest that the mechanism of action of NDGA on DENV1 is related to its lysosomotropic effect, which inhibits the viral uncoating process.	pmid:36126544 doi:10.1016/j.phymed.2022.154424	Tue, 20 Sep 2022 06:00:00 -0400
7	pubmed:36126642	<a href="#">Oral mucositis on a chip: modeling induction by chemo- and radiation treatments and recovery</a>	Khanh Ly Xiaolong Luo Christopher B Raub	Oral mucositis (OM) is a debilitating complication affecting roughly 70% of head and neck cancer patients receiving chemotherapy and/or radiation treatment. No broadly effective preventative treatment for OM exists. Therefore, an in vitro model of cancer treatment-induced OM would aid studies into possible origins of the pathology and future drug targets to ameliorate it. In this study, we present a microfluidic oral mucosa triculture tissue construct consisting of a keratinocyte layer attached...	pmid:36126642 doi:10.1088/1758-5090/ac933b	Tue, 20 Sep 2022 06:00:00 -0400

These molecules are highly expressed in mammalian cells and show cell/tissue-specific expression patterns. They are also significantly dysregulated in various cancers and function as oncogenes or tumor suppressors. Emerging evidence reveals that circRNAs contribute to cancer progression via modulating different cell signaling pathways. Nevertheless, the functional...	pmid:36126723 doi:10.1016/j.lfs.2022.120975	Tue, 20 Sep 2022 06:00:00 -0400

14	pubmed:36126995	<a href="#">Integrating specialist palliative care to improve care and reduce suffering: cystic fibrosis (InSPIRe:CF) - study protocol for a multicentre randomised clinical trial</a>	Jane Lowers Elisabeth P Dellon Anne Stephenson Robert Arnold Andrew Althouse Kwonho Jeong Ethan Dubin Jesse Soodalter Cade Hovater Marie Bakitas Jessica Goggin William Hunt Sigrid Ladores Kimberly Curseen Gretchen Winter George Solomon Jonathan Ailon Douglas Conrad Dio Kavalieratos	INTRODUCTION: Cystic fibrosis (CF) is a life-limiting genetic disorder estimated to affect more than 160 000 individuals and their families worldwide. People living with CF commonly experience significant physical and emotional symptom burdens, disruptions to social roles and complex treatment decision making. While palliative care (PC) interventions have been shown to relieve many such burdens in other serious illnesses, no rigorous evidence exists for palliative care in CF. Thus, this study...	pmid:36126995 doi:10.1136/bmjresp-2022-001381	Tue, 20 Sep 2022 06:00:00 -0400
15	pubmed:36127205	<a href="#">Current Treatment Options in Cold Agglutinin Disease: B-Cell Directed or Complement Directed Therapy?</a>	Sigbjørn Berentsen Geir E Tjønnfjord	Two major steps are identified in the pathogenesis of cold agglutinin disease; clonal B-cell lymphoproliferation and complement-mediated hemolysis. Each of these steps constitutes a target for treatment. In this focused review, we address 2 successful therapeutic approaches; the bendamustine plus rituximab combination as a highly efficacious B-cell directed therapy and the anti-C1s monoclonal antibody sutimlimab as the most extensively studied complement-targeting therapy. We describe and...	pmid:36127205 doi:10.1016/j.tmr.2022.05.001	Tue, 20 Sep 2022 06:00:00 -0400
16	pubmed:36127221	<a href="#">Application of dendritic cells in tumor immunotherapy and progress in the mechanism of anti-tumor effect of Astragalus polysaccharide (APS) modulating dendritic cells: a review</a>	Dong Wang Qian Cui Yan Jie Yang A Qing Liu Guan Zhang Jian Chun Yu	Dendritic cells (DCs) are potent antigen-presenting cells (APCs) that are essential in mediating the body's natural and adaptive immune responses. The body can regulate the function of DCs in various ways to enhance their antitumor effects. In the tumour microenvironment (TME), antigen-specific T cell responses are initiated through DC processing and delivery of tumour-associated antigens (TAAs); conversely, tumour cells inhibit DC recruitment by releasing metabolites, cytokines and other...	pmid:36127221 doi:10.1016/j.biopha.2022.113541	Tue, 20 Sep 2022 06:00:00 -0400
17	pubmed:36127263	<a href="#">Immunomodulatory properties of HDAC6 inhibitors in cancer diseases: New chances for sophisticated drug design and treatment optimization</a>	Bernhard Biersack Bianca Nitzsche Michael Höpfner	Histone deacetylases (HDACs) are promising targets for the design of anticancer drugs. HDAC6 is of particular interest since it is a cytoplasmic HDAC regulating the acetylation state of cancer-relevant cytoplasmic proteins such as tubulin, Hsp90, p53, and others. HDAC6 also influences the immune system, and the combination of HDAC6 inhibitors with immune therapy showed promising anticancer results. In addition, the design of new HDAC6 inhibitors led to potent anticancer drugs with...	pmid:36127263 doi:10.1016/j.semcd.2022.09.009	Tue, 20 Sep 2022 06:00:00 -0400

Currently, many drugs targeting gene fusions are being approved for clinical application. At present, tyrosine receptor kinase (TRK) inhibitors targeting neurotrophic tyrosine receptor kinase (NTRK) gene fusions are among the first "tumor agnostic" drugs approved for pan-cancer use. Representative TRK inhibitors, including larotrectinib and entrectinib, have shown high efficacy for many types of cancer. At the same time,...	pmid:36127731 doi:10.1111/1759-7714.14644	Tue, 20 Sep 2022 06:00:00 -0400

DSAs with mean fluorescence intensity (MFI) greater than 5000 have been associated with significant graft failure, but lower MFI values between 2000 and 5000 may result in poor graft function after hematopoietic...	pmid:36129238 doi:10.1002/pbc.29993	Wed, 21 Sep 2022 06:00:00 -0400
68	pubmed:36129287	<a href="#">Characterization of Phage Resistance and Their Impacts on Bacterial Fitness in <i>Pseudomonas aeruginosa</i></a>	Na Li Yigang Zeng Mengran Wang Rong Bao Yu Chen Xiaoyu Li Jue Pan Tongyu Zhu Bijie Hu Demeng Tan	The emergence and spread of antibiotic resistance pose serious environmental and health challenges. Attention has been drawn to phage therapy as an alternative approach to combat antibiotic resistance with immense potential. However, one of the obstacles to phage therapy is phage resistance, and it can be acquired through genetic mutations, followed by consequences of phenotypic variations. Therefore, understanding the mechanisms underlying phage-host interactions will provide us with greater...	pmid:36129287 doi:10.1128/spectrum.02072-22	Wed, 21 Sep 2022 06:00:00 -0400
69	pubmed:36129301	<a href="#">Microevolution of CG23-I Hypervirulent <i>Klebsiella pneumoniae</i> during Recurrent Infections in a Single Patient</a>	Yao-Chen Wang Min-Chi Lu Yia-Ting Li Hui-Ling Tang Pei-Yi Hsiao Bo-Han Chen Ru-Hsiou Teng Chien-Shun Chiou Yi-Chyi Lai	CG23-I lineage constitutes the majority of hypervirulent <i>Klebsiella pneumoniae</i> . A diabetic patient suffered six episodes of infections caused by CG23-I <i>K. pneumoniae</i> . A total of nine isolates were collected in 2020. We performed whole-genome sequencing to elucidate the within-patient evolution of CG23-I <i>K. pneumoniae</i> . The maximum pairwise difference among the nine longitudinally collected isolates was five single nucleotide polymorphisms. One of the mutations was at the Asp87 position of GyrA....	pmid:36129301 doi:10.1128/spectrum.02077-22	Wed, 21 Sep 2022 06:00:00 -0400

These organelles transport cargo from the donor membrane to the target membrane through the cargo containing vesicles. Vesicle trafficking pathway includes vesicle formation from the donor membrane, vesicle transport, and vesicle fusion with the target membrane. Coat protein mediated vesicle formation is a delicate membrane budding process for cargo...	pmid:36129576 doi:10.1186/s43556-022-00090-3	Wed, 21 Sep 2022 06:00:00 -0400
